

PORTLAND STATE UNIVERSITY: SERVING THE METROPOLITAN REGION

PSU QUICK FACTS

- Total Enrollment: 28,241
- Undergraduate: 22,613
- Graduate: 5,628
- Full-time: 61 percent
- Part-time: 39 percent

COLLEGES AND SCHOOLS

PSU offers 211 degree programs:
88 Bachelors; 86 Masters; and 37
Doctorals within 8 colleges:

- College of the Arts
- College of Liberal Arts and Sciences
- College of Urban and Public Affairs
- Graduate School of Education
- Maseeh College of Engineering and Computer Science
- School of Business Administration
- School of Social Work
- Urban Honors College

PORTLAND STATE UNIVERSITY AT A GLANCE

PSU's 49-acre campus is located in the heart of Portland, one of the most vibrant and livable cities in the United States. PSU's central location provides students with remarkable community access for classroom projects, senior capstone courses, field-based experiences and internships.

In 2015, PSU granted over 6,000 degrees. Twenty-eight percent of the bachelor's degrees went to students of underrepresented minority groups reflecting the state's growing diversity. Two-thirds of students enrolled at PSU are from the metropolitan region. The vast majority of graduates live and work in the Greater Portland region.

LET KNOWLEDGE SERVE THE CITY

With over 500 active business and community partnerships, PSU is deeply engaged in all aspects of Portland business and civic life. PSU offers students hands-on, real-world experience to prepare them for the workforce.

Key partnerships with public, private and non-profit partners -- including Intel, PGE, City of Portland, Multnomah County, and the Technology Association of Oregon -- provide students and faculty with outstanding opportunities to contribute to the economic, physical, cultural and social fabric of the Portland metro region.

Portland State University is one of the largest urban campuses in the US, and is served by a robust transit system throughout the metro area.

UNIVERSITY - INDUSTRY PARTNERSHIPS

Students gain access to 540 of the region's largest and most innovative employers and community partners in key industry areas:

SEMICONDUCTORS

Intel, the world's largest and most valued semiconductor manufacturer, employs 17,000 in Hillsboro, OR and is the state's largest employer. PSU has a significant partnership with Intel that revolves around 3 pillars: building the STEM K-12 pipeline; producing work ready graduates; and faculty research. Over 1,100 PSU graduates are employed by Intel – more than any other Oregon university. In 2013-2014, PSU's engineering school placed 108 interns at Intel.

SOFTWARE

To meet Portland's steep demand for software engineers, PSU created the PSU/PDX Cooperative Education Program (PCEP) in 2012. The program places high achieving computer science students in two-year, paid internships at downtown technology companies, including many of the region's fastest growing software firms. Students balance 20-hour workweeks with eight to 12 credits of coursework.

ENERGY

Portland General Electric is Oregon's largest utility serving over 840,000 customers in 52 Oregon cities. Through financial support for the PSU Power Engineering Lab, PGE creates hands-on, project experiences for undergraduate and graduate power engineering students. Since 2012, 18 funded projects totaling over \$500,000 have supported 22 students. In the 2015-2016 academic year, PGE and PSU established a year-round internship program for engineering and business students.

STRATEGIC PARTNERS

Intel, Portland General Electric, Oregon Health and Sciences University, City of Portland, Portland Public Schools.

BUSINESS ACCELERATION AND ENTREPRENEURSHIP

PSU's Business Accelerator is Ground Zero for entrepreneurial activity on campus, providing office space and a wealth of resources to startup science and technology companies.

The Accelerator is Oregon's oldest and largest and was named Technology Business Incubator of the Year in 2015 by the National Business Incubator Association.

Home to more than 30 startup companies in technology, bioscience and clean tech, the Accelerator has attracted more than \$150 million in private venture capital and government grants since 2004.

2013 Business Accelerator Statistics	
Capital raised	\$11.8 million
Revenue generated	\$17 million
Grants received	\$4.3 million
Full time employees	196
Hands-on work experience	68
